1. Claims 1-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 3, the expression of "preferably" is considered indefinite in that it is not clear what scope is claimed. Claim 7-12 are improper apparatus dependent claim depending from a method claim since they can be infringed without infringing the base claim from which they depend. Further, in claim 7, it is not clear what different between "means for controlling and regulating the position of additional rolls placed above the strip in said roll conveyor" and "means for controlling the temperature downstream of said loop". In claim 10, the meaning of "reciprocal distance" is not clear.

2. Claims 1-12 contain allowable subject matter and will be allowed upon the rejection under 35 USC 112 supra is overcome.
